appSolute Deployment Overview

Thomas Hansen

Technical and Services Director, appSolutions a|s

thomas@app-solutions.com

Agenda

- **appSolute Excellence: Company profile**
- appSolute Deployment
- appSolute Management

appSolute Excellence

appSolute Management

Change Management solution integrated with Roundtable TSMS®

appSolute Deployment

Deployment processing toolset extensions for Roundtable TSMS®

appSolute Consulting

Evaluation, implementation, upgrades of Roundtable TSMS®, Progress and Dynamics environments, ...

appSolute Development

Application Architecture, Development, Deployment and hosting of Progress OpenEdge applications

appSolutions - PROGRESS

Progress Application Partner

PROGRESS technology experience
since 1995

- Tech Support, Consulting, Training, Design, Development & Deployment
- Services provided to partners and customers direct or through Progress Software world-wide

appSolutions – PROGRESS ...

- PROGRESS Dynamics[®]
 - Maintenance of Roundtable Dynamics integration and Roundtable Dynamics Deployment packages
- Other Progress-based frameworks & tools

Extreme Dynamics founding member

appSolutions - Roundtable

Roundtable TSMS®

- Technical Support for European customers
- European Pre-sales and Sales
- Roundtable TSMS® consulting and mentoring
 - Consulting, Evaluation, Implementation, Training, Customization and maintenance of Roundtable environments

appSolutions - Roundtable

Roundtable TSMS® ...

- Framework integration
 - Roundtable® PROGRESS Dynamics®
 - Roundtable DWP – 2008
 - Integration with other Progress-based frameworks underway

Agenda

appSolute Deployment

- ❑ Toolset extends RTB deployments for automated processing
- ❑ Configurable standardized application deployment processing

appSolute Deployment

Deployment processing

- Batch processing
 - GUI, TTY, Batch
- Application compilation
- Partition processing (e.g. AppServer and WebClient) in staging environment
- Procedure Library generation
- WebClient project file updates

appSolute Deployment...

- Ant script automation
 - Package and move RTB deployments
 - Process deployments – multi-platform
 - Release deployments
 - Transfer from processing to production (across platforms)

appSolute Deployment...

- Enhancements to application managed within RTB
 - Available as Roundtable partner deployment package
 - Easy installation and variant
 - Easy delivery of updates
 - Deployed as part of application

Processing Overview

- Configure general “rules” for deployment processing
 - rtbdeplcfg.xml – partition process rules
 - Product modules
 - Code subtypes
 - Exceptions
- Create deployment from RTB
 - Generates extended control file (rtb_idat/dynobjctrl)
 - Generates deployment control file (rtbdeplctrl) with deployment info for ant script usage

Processing Overview

- Process deployment
 - Update databases using DCU (optional) or _update.w (optional)
 - Run _update.w
 - Compile application code
 - Process application partitions
 - Build Procedure Libraries
 - Update WebClient project file
 - Update and restart AppServer
 - Update WebClient Intellistream delivery

appSolute Deployment- Roadmap

- Managed application distribution
 - Automated multi-point application distribution
 - Integrated with appSolute Management
 - Client deliveries
 - Client product management
- Integration with AntHillPro (www.anthillpro.com) – Server and Agent based build automation

Agenda

- appSolute Excellence: Company profile
- appSolute Deployment
- **appSolute Management**

appSolute Management

appSolute Management

appSolute Management

- Standard edition
 - Product Management
 - Client & Client Product Management
 - CallDesk
 - E-mail integration
 - Release Planning Management
 - Knowledgebase
 - Roundtable Integration
 - HelpDesk integrated with Tasks in Roundtable TSMS

appSolute Management...

appSolute Management

- Enterprise Edition
 - Project and TimeSheet management
 - Client delivery management
- Progress WebClient demo available at <http://demo.app-solutions.com>
